LICENCE PLATE COLOUR PLAN

02415

The attached colour plan for licence plates in British Columbia and the Yukon will be the basis of our preprinted steel, aluminum and paint orders during the period 1969-1978 inclusive. Please note that this plan varies from the proposal forwarded to you under cover of my memo of April 27, 1970, and incorporates changes requested by some Departments.

This plan is designed to avoid colour conflict between agencies, permit the most economic base for purchasing, and has received the approval of each agency.

Whitehorse, Yukon Territories

LICENCE PLATE COLOUR PLAN
1970 through 1978

To facilitate the co-ordination necessary in producing a combination of single and multiple year plates and to insure materials are available at the most economic price when required, the attached colour plan has been developed.

The colours selected have proven to be the best from a standpoint of reflectivity and ease of recognition over the past ten years and are planned to avoid a conflict from one year to the next and yet maintain the common background colour "white".

Should you feel this plan is not acceptable, please let me know your objections and I will endeavor to adjust it accordingly.
